APA Scholarly Assignment (Week 6)

NR351: Foundational Concepts for the Practicing RN

Dr. Lisa LeBlanc

Abstract

This paper provides a summary of the assigned article on the integration of palliative care into nursing education and practice, highlighting the escalating need amid the COVID-19 pandemic and recommendations for enhancement. Additionally, it addresses how technology helps or hinders nursing practice in relation to palliative care, drawing two relevant scholarly articles. The discussion emphasizes the ethical imperative for nurses to deliver primary palliative care and the potential of technological tools to support or impede this process.
