

NR 546 Week 3 Case Study

Subjective	Objective
Patient's Chief Complaints: "I'm in danger" History of Present Illness ML is a 22-year-old Hispanic male brought in by his parents due to increasingly erratic behavior, social withdrawal, and impaired occupational functioning. ML states he believes he is being followed and "they are trying to get me and take me." ML states the voices tell him he is being watched. He states he can hear two people talking to him and "they tell me everything, I know what people are saying." He reports the voices tell him people want to lock him up. This has been occurring for the past 6 months now and the voices have become more frequent. ML displays disorganized thoughts, paranoid ideation, and auditory hallucinations. Family members express worry about his well-being and seek professional help due to a decline in functioning. Past psychiatric history: None Past Medical History: Acid reflux treated with OTC Tums. Family History • Father is alive, has anxiety	Physical Examination: General Alert, appropriately dressed Hispanic male in no apparent distress. He appears older than his stated age. Vital Signs: BP-124/84, T-98.8F, P-82, RR-20, SpO2: 98% Wt 200 lbs, Ht 5'10"
