

Week 3 Discussion

Follow these guidelines when completing each component of the Collaboration Café. Contact your course faculty if you have questions.

General Instructions

Step 1: Review your assigned client scenario below. Your assigned client is based on the first letter of your last name in the chart below. The scenarios below depict inappropriate or excessive opioid use.

Last Name	Client from Week 3 Lesson
A - E	David Ball, a 45-year-old male, is currently taking hydromorphone (Dilaudid) 4mg PO QID for chronic pain from fibromyalgia.
F - J	Terrence Brown, a 71-year-old male, is currently taking oxycodone 10mg/acetaminophen 325mg (Percocet) QID for neuropathic pain from diabetic peripheral neuropathy.
K - N	Geraldine Marzec, a 60-year-old female, is currently taking oxycodone ER (OxyContin) 20mg PO BID for chronic low back pain from an old injury.
O - R	Bola Ogunwande, a 31-year-old female, is currently taking oxymorphone ER (Opana) 5mg PO QID for migraines.
S - V	Le Chin, a 54-year-old male, is currently taking morphine sulfate (MS Contin) 30mg PO TID for dental pain.
W - Z	Marianne Rubenstein, an 80-year-old female, is currently taking hydrocodone 10mg/acetaminophen 325mg (Norco) PO QID for osteoarthritis.

Step 2: Review the client's case and CDC's (2022) CPG related to opioid prescribing. You can use the Ctrl F function on your keyboard to assist in your review of the CPG to help find keywords.

Step 3: Analyze and critique your assigned case and answer the prompts below with explanation and detail, providing complete references for all citations.

Step 4: Reply to peers with different assigned clients.
