Question 1

1 / 1 pts

A 31-year old female has diarrhea and is wondering if she can take loperamide (Imodium). Which of the following is true regarding loperamide?

It may be used in pregnancy and by lactating women.

Correct!

It slows gastric motility and reduces fluid and electrolyte loss from

diarrhea. It is the treatment of choice for the diarrhea associated with E. coli 0157.

It can be given to patients of all ages, including infants and children, for viral gastroenteritis.

Question 2

1 / 1 pts

Which non-pharmacological intervention is an appropriate lifestyle modification for infants and children?

Thicken formula with rice cereal.

Correct!

Anti-reflux maneuvers (elevate head of bed).

Do not eat within 4-6 hours of going to bed.

Supine position postprandially when infant is awake.
