

Week Eight:

Reflect on your learning experience in this course. Which concepts stood out to you and made an impact? How do you envision using these concepts in your future nursing practice as a master's prepared nurse?

I felt that I learned so much valuable information each week throughout this course. One set of concepts that stood out to me is giving antibiotics. I feel that this is a big thing because they are given so much. We have to make sure are them for true infections and not risking build up a resistance. In addition, I think it was important to learn about SSRIs and SNRIs because they are given so much as well

Describe how course learning activities and assignments will help you achieve Program Outcome Provide high-quality, safe, patient-centered care grounded in holistic health principles.

- The weekly discussion scenarios that made me critically think about my patients condition and how to treat it. I think this was helpful by making us critically think about a various different situations and how we would plan to treat the patient.

Describe how course assignments or activities will help you achieve ONE of the sub-competencies from the advanced-level nursing education competencies from AACN Essentials Competency 1.3 Demonstrate clinical judgment founded on a broad knowledge base.

1. 1.3d Integrate foundational and advanced specialty knowledge into clinical reasoning.
2. 1.3e Synthesize current and emerging evidence to influence practice.

1.3f Analyze decision models from nursing and other knowledge domains to improve clinical judgment

- The weekly discussion boards helped me build foundational knowledge regarding a variety of different diseases. In addition, it helped me think how I would plan to treat the patient based on their allergies and current situation.
