Week 7 Collaboration Cafe

Discussion Question

1. Describe your assigned client's situation. What medications are they currently taking? Why are they presenting to the clinic?
2. Assess the applicable clinical practice guideline (CPG) for your assigned client. What treatment is recommended by the CPG for your client's situation?
3. Share your professional assessment of the client's situation based on the information provided. What pharmacological treatment is necessary and why?
4. Reflect on additional questions you have about your assigned client that may influence treatment. What else do you need to know? What follow-up assessments, labs, or conversations are required to ensure optimal health outcomes?

1. Client's Situation:

- Patient: Corretta Freeman (DOB 22February1997) (27-year-old female)
 - Non-smoker, Non-drinker
 - Allergies: None
 - Married
- In Emergency Department (ED) with complaints of active migraine with aura.
