## **Problem Statement by Alexis Clermont on case Kathleen Hamilton**

KM is a 16 year old female, with a medical hx of reactive airway disease and eczema without medical intervention, who presents with mother. Patient reports SOB x3 days with mild exertion and a worsening non-productive cough (worse at night) that started x3 weeks ago. She denies CP, but reports tightness/heaviness. She reports runny nose and congestion starting x3 weeks ago and has since resolved. On exam, she is hypoxic at 95% room air; respirations are labored and regular, expiratory wheezing throughout lung fields, and substernal retractions are noted. Reports exposure to secondhand smoke from neighbors. Reports exposure to cockroaches. Denies current prescribed or OTC medications. Denies fever or sputum production.
