Exercises	Done	100% (of scored items only)	2min 16sec	1 of 1 correct (of scored items only)

**Problem Statement by [REDACTED] on case Max King**

M.K, 4-year-old male is presenting with his father for concerns of abdominal pain on and off the last 2 years with changes in his bowel movements. Father reports pain starts after eating and goes away after a few minutes. He has not noticed a change in his appetite or behaviors. The child diet consists of fried foods, no vegetables, 3-4 cups of milk a day. His bowel pattern is 4-5 days with small, pebble stools and over the last 3 weeks he has been leaking stool in his underwear. He denies any nausea, vomiting, diarrhea, foul-smelling or blood in the stool. The child has no medical problems, no surgical history or allergies. He has not attempted any treatment for abdominal pain or bowel leakage.

Attempt: 3689791
